

Best Management Practices

Steps that a company or person takes to ensure any work being done on their property is being done in an environmentally responsible manner.

What are some BMP's?

- Sand bags
- Rocks
- Steel Plates
- Silt fencing
- Straw waddle
- Water truck
- Storm sceptors

When do you use Best Management Practices?

- **Construction work**
- **Trucks leaving property**
- **Water flowing area**
- **Dry and dusty condition**
- **Rainy condition**

Why we use BMP's

- Hold back what may be a pollutant to streams
- Stabilize loose soil
- Protect the environment and surrounding habitat
- Minimize impacts
- Divert water

Be prepared!!

Know what you need.

Look for any obstacles you might encounter.

How to install BMP'S

- Sand bags – place side by side, drop in to place, pat down firmly
- Straw waddle - dig small trench, place fiber role in and stake down
- Silt fencing – dig small trench in between stakes, hammer in stakes and replace trench soil over fencing to hold in spot

Now you know how to install BMP's

Now we're going to apply what we've just learned about BMP's out in the field. Lets go to work !!

Any Questions?
